OBJECTIVE

iOS Developer with 6 years of experience in Swift, Clean Architecture, XCTest, and App Store deployment. Skilled in delivering end-to-end solutions across Banking, Aviation, Health, and Crowdfunding domains, with expertise in Agile and independent project execution.

SKILLS

- **Languages:** Swift   **Frameworks/Tools:** Xcode, SwiftUI, Core Data, 3rd-Party Libs

- **Practices:** Clean Architecture, Agile, Git, Leadership, XCTest Cases

EXPERIENCE

- **Nagarro**   Gurgaon, WFH
  Senior Engineer   *Oct 2023 - Present*
  - Developed and maintained UI components, API frameworks, and reusable modules for an Aviation domain project, ensuring scalable architecture.
  - Implemented XCTest cases to improve code coverage, integrated GitHub Actions for CI/CD, and enhanced overall code quality.
  - Handled push notifications, app updates, Core Data integration, and data compression to optimize app size, stability, and performance.
  - Successfully delivered 2–3 key modules with high-quality, bug-free output, contributing to improved user experience and product reliability.
  - Demonstrated strong leadership and collaboration skills, effectively coordinating with team members and stakeholders to achieve project goals.

Infosys   Jaipur
Technology Analyst   *Mar 2022 - Oct 2023*

- Contributed to the Open Banking project for a leading UK bank, collaborating with cross-functional teams to design, develop, and enhance iOS applications, improving the overall digital banking experience.

- Managed and resolved assigned tickets, ensuring timely delivery, efficient debugging, and adherence to project deadlines.

- Completed multiple Infosys certifications and courses in iOS development, consistently upgrading skills and staying current with mobile development trends, best practices, and emerging technologies.

Evolko   Lucknow
Software Developer   *Apr 2021 - Feb 2022*

- Implemented new enhancements and functionality across multiple iOS applications, contributing to improved performance and user experience.

- Developed scalable and optimized code using the MVVM architecture pattern, ensuring maintainability and long-term application stability.

- Delivered key features, including pool functionality in the Evolko Doctor app, which enhanced usability and increased customer satisfaction.

- Served as the primary point of contact for the Evolko Patient app, managing bug fixes, implementing enhancements, and ensuring smooth day-to-day operation.

PROJECTS

- Lido MBriefing An aviation domain app used by leading airline pilots for digital briefing and flight operations support.
- HSBC Banking App Banking domain application where I worked on Aadhaar and address-related modules, improving onboarding and compliance workflows.
- Evolko A doctor–patient application enabling doctors to share prescriptions, while patients can chat, video call, and access digital prescriptions (RX).

Achievements

- Won Honorary prize at GT Hackathon 2025

- Runner Up at Agility Quiz

Education

- **B.B.D.N.I.T.M**   Lucknow, UP
  B.tech in Information technology; 1st division   *Aug 2015 - June 2019*
